NADER VAHDAT

Chemical Engineering Department Tuskegee University Tuskegee, AL 36088 nvadat@tuskegee.edu

Summery

Forty five years of experience in Chemical Engineering Education and research. Expertise include:

Curriculum development for chemical engineering, including new rtridges; Chemical polymer interaction with application in protective clothing materials, and membrane separation; Development of air monitoring instruments for aerosols and vapors; Development of fire extinguishing agents; Carbon dioxide capture from flue gas in power plants.

Education

Ph.D. (Chemical Engineering), University of Manchester, EnglanDepartment head, Chemical Engineering

Lawrence Livermore National Laboratory, Chemical Engineering, Tassociate Professor, Chemical Engineering Assistant Professor, Chemical Engineering Faculty, Chemical Engineer Assistant Professor, Chemical Engineering

Professional credentials, certifica

Professional Engineer (PE) in Alab Member of American Institute of C Member of American Society for E Service Achievement Award, Tusk

PROFESSIONAL ACTIVITIES

Consultant for chemical engin Major clients: Phillips Petro

American Tec Lawrence Liv

Contributions to the discipline (e

Department Head, Chemical Engin Member of Dean's Council, Colleg Member of Educational Policy Cor Member of Personnel Committee, College of Engineering Member of Department Head's Council, Tuskegee University Served on Faculty Senate, Tuskegee University Served on Bio-Hazard Committee, Tuskegee University

"Carbon capture and CCS Research at Tuskegee University", Presented at the Second Annual Tuskegee Forum on Carbon Capture and Storage (CCS) Technologies, April 26, 2010, Tuskegee, AL

"Geological Sequestration Training and Research Program in Capture and Transport: Development of the Most Economical Separation Method for CO₂ Capture", Presented at the NETL/DOE Kickoff Meeting, March 22, 2010.

"Development of the Most Economical Separation Method for CO₂ Capture", Presented at the NETL/DOE Annual Meeting, February 23, 2011.

"Development of a model to screen different absorption processes for possible use for CO₂ capture" presented at the Tenth annual Carbon Capture & Seques
