Materials Chemistry and Physics (Elsevier)

Materials Research Bulletin (Elsevier)

Synthesis of multiferroic or Ferroelectric or Dielectric materials in different forms (such as ceramics in bulk and nano form, flexible polymer sheets or thick film) using various preparation method (such as Solid state reaction method, Chemical method, Ball milling or mechanical alloying, solution casting method etc.).

Characterization and analysis of different properties (such as structural using XRD, microstructural using SEM, Dielectric and impedance spectroscopy, transport properties (AC and DC), Multiferroic) of materials.

Software: Origin, Zsimpwin, MAUD, Xpert High Score, Mathematica, Fortran, Latex

A handwritten signature in black ink on a light green background. The signature reads "Sushrisangita Sahoo". To the right of the signature, there is a small, colorful logo consisting of several vertical bars of different colors (yellow, green, blue, red) and a small icon of a person. A small vertical text "© 2023" is visible on the right edge of the signature area.
